CURRENT PROJECT

simpl:api - Headless CMS Solution

Project Owner | Jul 2022 - Current

- Headless CMS for a wide range of use cases from personal blog to inventory and e-commerce data processing
- Drag-and-drop visual builder for content modelling and full REST API for programmatic content management
- Role-based Access Control for users and API Keys, rate-limiting support, statistics and detailed logging per request

WORK EXPERIENCE

Frontend Developer Intern | Bimar IT Services | Izmir, TR

Jun 2020 - Aug 2020 | **Main Task:** Developing SQL Server Agent Monitoring Web Application (**Project ssajv**)

- Collaborated with BI team to enhance the application's frontend design
- Built dashboard reducing manual SQL Server Agent job tracking across departments
- Enabled cross-department job scheduling by developing 15+ REST API endpoints for downstream integration
- Delivered insights for SQL Server Agent Job scheduling optimization

Freelance Full-Stack Developer | Self-Employed | Remote

Mar 2017 - Oct 2019

- Built web applications for small businesses and events during full-time university enrolment.
- **Featured Projects:**
- **COSKK CMS:** A custom CMS designed to improve the admin panel and add new key features, including rolebased access control, i18n support, and sub-websites for organizational needs
- **Certification Platform:** : A universal certification hub to enhance the employment process, and it was awarded second place in an event organized by Turkish Airlines
- **OGT CMS:** Tailored CMS for participant data management and event execution at Global Game Jam EGE and E-Sport Tournaments
